## Monserrat Perez

**MEDICAL ASSISTANT**

*“Just as soon as you attain to one ambition you see another one glittering higher up still. It does make life so interesting.”*

**Lucy Maud Montgomery**

Monserrat Perez grew up in the southside of San Antonio. She graduated from Harlandale High School in 2019, where she was part of Health Occupations Students of America, National Society of High School Scholars, and Family Career Community Leaders of America. In high school, she found her passion for the medical field and her inspiration to help those in need.

After graduating with an associate of science degree, Monserrat decided to continue her education for an associate in applied science and complete the medical assistant program.

She has always worked hard to excel in school and make her parents proud since they were not able to complete higher education in Mexico. Throughout her academic journey, she’s been recognized by San Antonio College with Honor Distinctions and has been appointed to the President’s list.

She plans to attend the School of Nursing at UT Health San Antonio to earn a bachelor’s degree. She aspires that her work ethic, resilience, and empathy will make a difference in society by serving community clinics.

Her experience at San Antonio College has prepared her with the right learning skills to continue her level of knowledge, and to succeed at anything she aspires to in the future.
